

SAMPLE BMW PROCEDURE for Transmission Replacement And Repair

Autologic BMW software provides a straightforward adaptation procedure for an SMG gearbox, through a small sequence of simple steps to guide the user. Using BMW E60 M5 as an example model, the maximum sequence length is shown below.

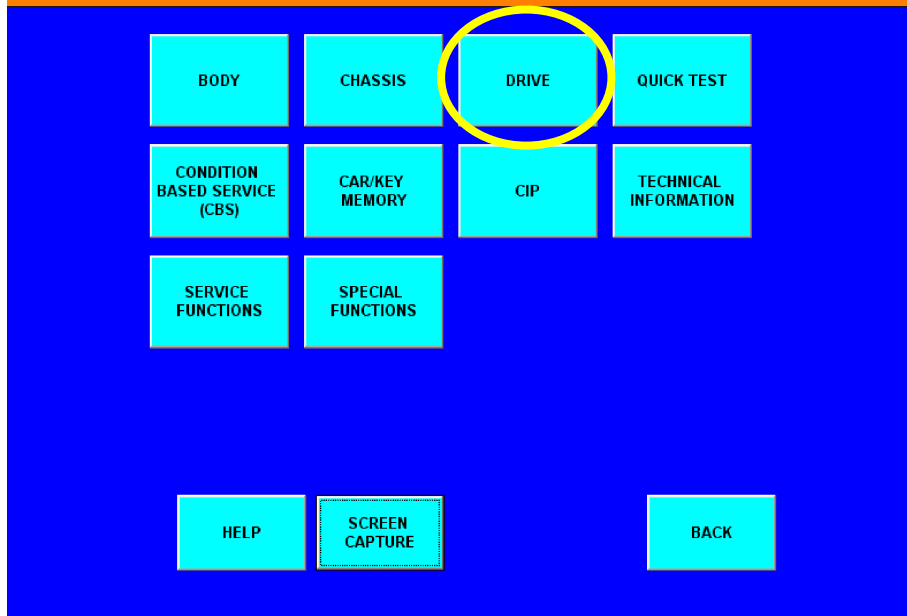

1. Select model

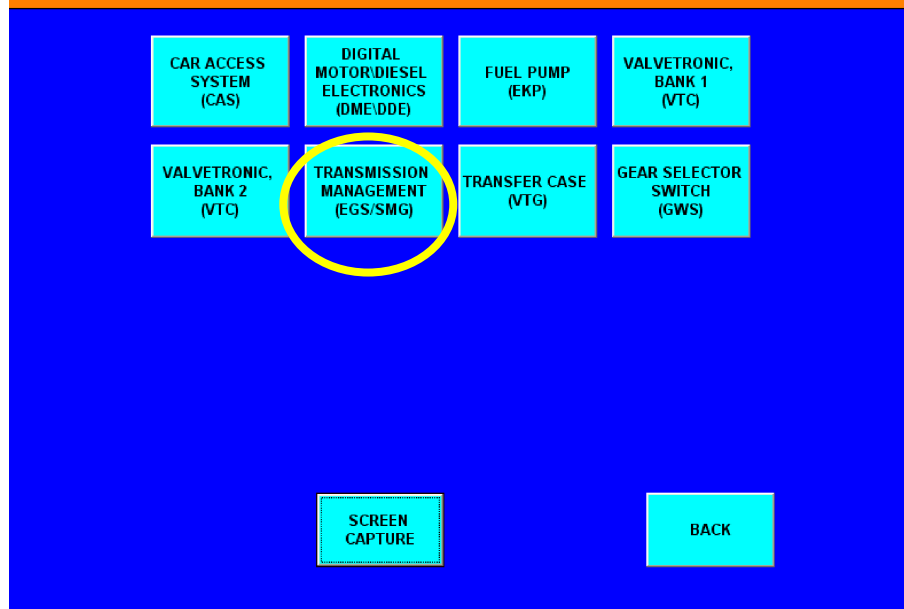

2. Select chassis

5 SERIES (E60)

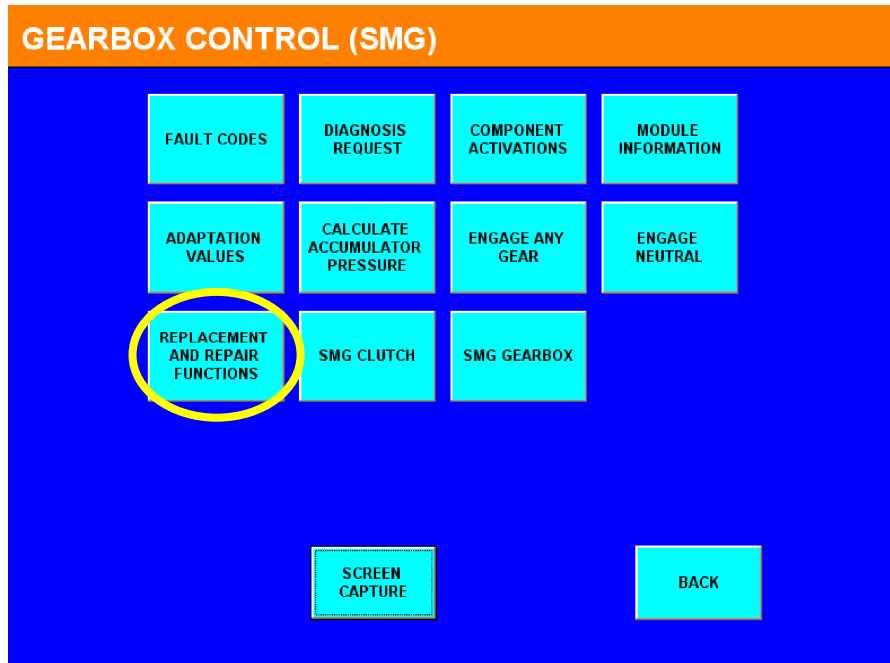

3. Select DRIVE systems

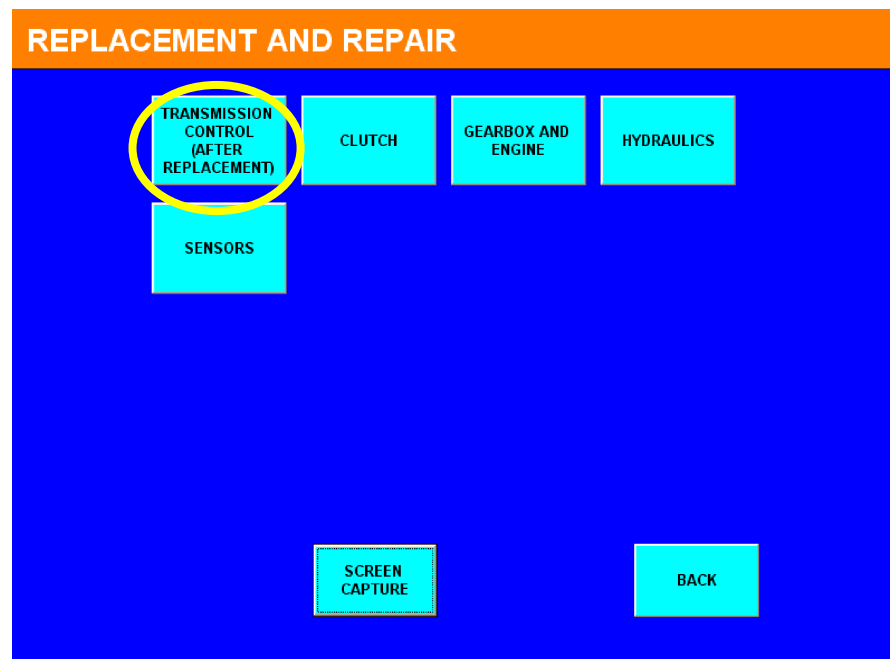

DRIVE (E60)

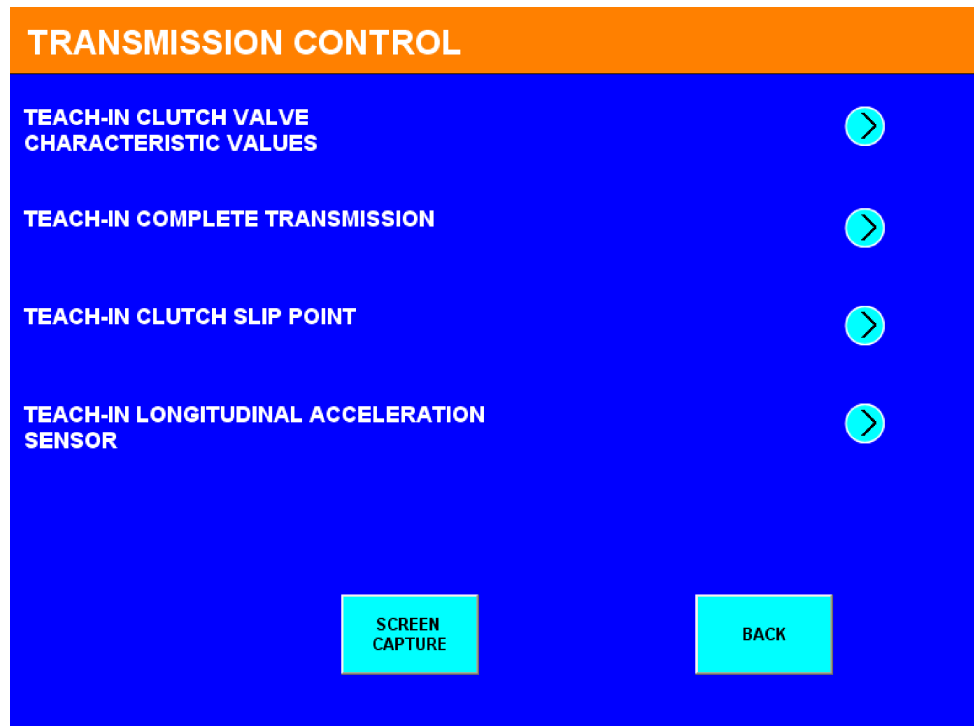

4. Select control unit e.g. EGS/SMG

5. Select service functions *e.g.* **REPLACEMENT AND REPAIR**

6. Select **TRANSMISSION CONTROL (AFTER REPLACEMENT)**

7. Finally, select relevant sub-function(s).

In this example, each of the sub-functions would need to be undertaken to fully adapt the SMG gearbox. *Autologic* will then guide the user through all necessary subsequent screen shot for each sub-function.

End of procedure
